

WEBSITES FOR ENVIRONMENTAL INFORMATION

Oil and Gas Wells – The Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) provides information oil wells throughout California. This website provides information on the owner of the well, the status of the well, along with the location of the well on a map. This information can be found on the Department of Conservation website at, <http://www.conservation.ca.gov/dog/Pages/Wellfinder.aspx>.

“LUST” – LUST stands for Leaking Underground Storage Tanks. A LUST site is an area that can be contaminated by either underground storage tank spills or overflows from when USTs were in use. Information about the location and status of LUST sites can be found on the California State Water Resources Control Board GeoTracker website, <http://geotracker.waterboards.ca.gov/>.

Gas/Hazardous Pipelines – The National Pipeline Mapping System allows users to view maps of gas transmission pipelines and hazardous liquid pipelines that run near their property. This information can be found at the NPMS Public Map Viewer, <https://www.npms.phmsa.dot.gov/default.aspx>.

Superfund Sites – A Superfund site is an uncontrolled or abandoned area that houses hazardous waste which can impact the local ecosystem or populous. Superfund sites near your property can be found at the EPA’s website, <https://www.epa.gov/cleanups/cleanups-my-community>.

RCRA Sites – Resource Conservation and Recovery Act (RCRA) facilities may sometimes produce hazardous waste releases and/or hazardous constituents into soil, ground water, surface water, sediment, and air. RCRA sites can be found using the EPA’s website, <https://www.epa.gov/cleanups/cleanups-my-community>.

Solid Waste Landfill Sites (SWIS) – The Solid Waste Information System contains information on solid waste facilities, operations, and disposal sites throughout the State of California. Information on various types of solid waste landfill sites can be found on the Cal Recycle website, <https://www2.calrecycle.ca.gov/SWFacilities/Directory/Search.aspx>.

SLIC Sites – Spills, Leaks, Investigation, and Cleanup (SLIC) sites are areas where chemical releases have contaminated soil and/or groundwater. SLIC sites can be found on the California State Water Resources Control Board GeoTracker website, <http://geotracker.waterboards.ca.gov/>.

California State Response List (DTSC) – The California State Response List provides the locations of sites determined by the Department of Toxic Substances Control that are confirmed release sites of high potential risks. These sites may be found using the California State Water Resources Control Board GeoTracker website, <http://geotracker.waterboards.ca.gov/>.
